

# Megaderm: Quick Reference Guide

**Species:** Cats, Dogs

**Ranges:** Dermatology

## INDICATIONS

An ideal maintenance product for dogs and cats prone to skin conditions and those with normal skin.

Helps manage pruritic and inflamed skin conditions in dogs and cats.

Megaderm now comes in pre-measured dose sachets that are very easy to use. The sachets preserve the fatty acids therefore leading to better stability and better palatability of the product.

5 : 1 ratio of Omega 6 to Omega 3

5 : 1 is more consistent with anti-inflammatory needs. Synergistic effects of restoring skin integrity and assisting anti-inflammatory approach.

**Supplementation of Primary Essential Fatty Acids** - Improves hair coat quality, reinforces skin integrity, maintains efficient epidermal barrier function and provides nutritional support for cases of pruritus and inflammation.

**Supplementation of Zinc** - Zinc deficiency affects skin cell metabolism, can cause depressed growth, excess keratin and impaired wound healing.

**Complete Dietary Supplement** - Adjunct for chronic pruritus, seborrhoea and allergy (eg. FAD & Atopy) treatments.

**Adjunct for corticosteroid therapy** - Influences the clinical expression of inflammation and allows a reduction of corticosteroid therapy.
